

# STEP

## Selective Traffic Enforcement Program

The STEP program is a course of action by the Countryside Police Department, in which specific sites in the city are slated for concentrated traffic enforcement. These sites are normally selected by statistical data which indicates an area with high traffic accidents; in particular, the intersection of LaGrange Road and Joliet Road. This is a high traffic accident area. Other sites are selected based upon input from citizens with traffic concerns in a particular area or neighborhood.

The STEP program is used in conjunction with other Community Policing activities. The traffic enforcement emphasis in this program is for moving violations such as speed, DUI, and accident-causing violations—not parking issues. Current funding for the program is limited, but if you have suggestions for traffic details in the city, please contact Master Sergeant Bernie Duffy at 708-485-2494, or by e-mail at [bduffy@countrysidepolice.org](mailto:bduffy@countrysidepolice.org)
