

Countryside, IL

We are currently looking for an experienced professional that would like to grow along with us. We are a family owned construction firm that was started in 1984 with the majority of our projects being in small to medium scale commercial, government and private construction.

Construction Quality Control Manager/Project Manager

- Minimum 5 years of experience in the construction field
- Degree in Civil Engineering or Construction Management is not required but would be helpful
- Experience supervising structural features of work with a construction company
- Completed Construction Quality Management (CQM) for Contractors course is helpful
- Must be proficient in Word and Excel and comfortable learning new construction programs
- Capable of staying on task and completing all types of paperwork for projects
- Oversee and inspect all codes, performance standards and specifications, QA/QC policies and project requirements
