# Residential Chicken Check List

---

Pet chickens and outdoor chicken shelters on residential lots. In order to maintain pet chickens and outdoor chicken shelters, the following regulations shall be followed:

**Please initial on each line**

- No person shall keep or harbor any rooster.
  
- No person shall keep or harbor more than four (4) chickens on any residential lot. A permit form must be filled out with the Building Department for the chickens. The resident will indicate on the permit form the number of chickens they will keep or harbor. By signing the form, this allows the city to go on the property at any time to inspect the outside enclosure that the chickens live in.
  
- Chickens shall be kept in a covered outside enclosure or inside a residence or a garage when left unattended. The shelter regulations are described below.
  
- Chickens shall not be permitted to run at large in the city.
  
- Chickens may be allowed outside in a fenced rear yard area or other permanently fenced area or temporarily fenced area while in the presence of their owners or keepers.
  
- There shall be no slaughtering of any poultry outdoors on any residential lot.
  
- Chicken shelter regulations:
  - a. An outdoor shelter shall be located only in the rear yard of a lot and no closer than ten feet (10') of either side yard lot line and no closer than five feet (5') from any rear yard lot line and must be twenty five feet (25') from any neighboring house.
  - b. The interior area of any shelter and the rear yard area shall be maintained in a sanitary condition.
  - c. Outdoor shelters shall be designated to be architecturally compatible with the principal residence or any existing accessory structure or the principal residence's rear yard landscape theme and shall be constructed of quality, durable building materials. Outdoor shelters shall be constructed and maintained to be weatherproof in order to withstand inclement and extreme weather and to be secure from predators. A professional predator protection system approved by the Community Development Department shall be installed on any outdoor shelter.

**Accessory Structure:** Please note: Zoning codes have changed over the years. If you are replacing an existing structure, it must comply with the new codes.

The maximum size of any accessory structure is 720 sq. ft. (1,500 sq.ft. in R-7) or 40% of the rear yard (2.76% of the total lot in R-7). There may be a total of three accessory structures which combined don't exceed the individual maximum values. If there is a swimming pool, the combined area of all accessory structures and the pool must not exceed 25% of the rear yard.

Accessory structures must not be closer than ten feet to any structure other than a fence and shall not exceed 15 feet in height. They shall maintain a side yard setback of three feet in R-3, fifteen feet in R-7 and five feet elsewhere. The minimum rear yard setback is 50 feet in R-7 and five feet elsewhere. **Corner lots have special requirements concerning two front yard setbacks.**

**Residential Fences:** The maximum height allowed for all fences in the rear yard is six feet. The post holes must be set in at least three feet of concrete. All connections in wood fences must be secured with screws and not nails. Fences may be constructed with wood or metal. Note: slats of any kind are prohibited in chain link fences. Corner lots have special requirements concerning two front yard setbacks. It is best to bring in the Plat of Survey to discuss fencing allowed on these lots.
