LEED CERTIFICATION IS A GOAL

• Leadership in Energy and Environmental Design (LEED) is a rating system devised by the US Green Building Council (USGBC) to evaluate the environmental performance of a building and encourage market transformation towards sustainable design.

• LEED is simply a point system. The more energy efficient and "green" the building is, the more points it will earn. These points are earned through meeting credit requirements in 6 categories.
1. Sustainable Sites
2. Water Efficiency
3. Energy and Atmosphere
4. Materials and Resources
5. Indoor Environmental Quality
6. Innovation in Design
LEED INITIATIVES FOR THE MUNICIPAL COMPLEX

SUSTAINABLE SITE
- The building will meet all accessibility requirements.
- Bike racks are included.
- Multi-purpose path will be installed on the east side of Brainard Avenue next year.
- Staff is working with PACE regarding public transportation along Joliet Road.
- The building will serve as a storm shelter for residents and staff.
- There is room available to expand if needed in the future.

WATER EFFICIENCY
- Automatic on/off faucets and toilets will be installed.
- Irrigation system will be installed for the front/public side of the building only.

ENERGY & ATMOSPHERE
- Geothermal HVAC
- Energy efficient appliances and fixtures
- Occupancy sensors on interior lights
- Timers/sensors on exterior lights
- Solar panels are being considered
**LEED INITIATIVES CONTINUED**

**MATERIALS & RESOURCES**
- 75% of demolition materials will be recycled.
- Glass, aluminum and paper recycling containers will be installed in each department and multi-purpose rooms.
- Water fountains will include a bottle refill option.
- Irrigation will be limited to the front (public) area.
- Recycled or renewable materials will be selected where possible.

**INDOOR ENVIRONMENTAL QUALITY**
- Dimmable lighting fixtures.
- Individual offices will have their own thermostat.
- Large windows permit daylight to enter office spaces.
- Lights and temperatures will automatically adjust in off hours.
- A blow test will be performed to check air infiltration.
- Acoustical panels will be installed to manage sound.

**INNOVATION IN DESIGN**
This category gives the reviewer the ability to assign up to 6 points for an innovative design element.
