FOR THE LATEST ENERGY NEWS FROM ComEd

DON'T GET SCAMMED – Take a moment to protect yourself against fraud

ComEd is receiving more and more reports of scammers who go to great lengths to trick customers. We want to keep you informed on how to identify energy-related fraud.

Scammers make calls from what appear to be ComEd phone numbers and even visit customers' homes attempting to defraud them.

ComEd will never come to your home to request a payment and will never call you to:

- Ask for your account number
- Ask for personal information such as your social security number or bank information
- Ask you to make a direct payment with a prepaid cash card

If you experience suspicious behavior, please call **1-800-EDISON-1** to report or visit [ComEd.com/ScamAlert](https://www.comed.com/ScamAlert) to learn more.

Ways to Save

Explore Your Solar Options

Do you know that the sun is the most abundantly available renewable energy source? When you tap its power, you access clean, pure energy.

Why not take advantage of it? The smart grid allows you to make use of solar energy options that help leave a cleaner planet for future generations and that may also help you save money.

As solar options continue to grow, ComEd will work to ensure that the smart grid will connect you to them.

- With a private solar energy system, you receive credits on your energy bill when you produce more energy than you use.
- With a community solar energy system, access to solar energy may be available when a private solar energy system isn't right for you.

Why not take a closer look at solar? Whether you're ready for your own private solar energy system or would like to explore the benefits of community solar, we can help you through the journey.
